

Assignment #01 – PS657

Spring 2025-26

Max Marks: 10

Date: 06-02-2026

Each group is required to discuss and develop a presentation covering the following three points

1. What is a contemporary security architecture for a personal computing device?
2. What is a contemporary security architecture for an organization with about 10000 employees and that has offices/factories in many locations some of which may also be in other countries?
3. What is a contemporary security architecture for India as a country?

The groups are expected to produce a presentation with three parts, each part containing 2-3 slides. This presentation should be presented in class on Wednesday 18th Feb 2026. Each group will have 10 minutes for presentation followed by 5 minutes for questions.
